

Know Your Neighbourhood Spectrum Rainbow Community - Doncaster

Thank you for the opportunity!

Spectrum Rainbow Community strive to create and consolidate social inclusiveness and awareness for LGBTQIA+ seeking asylum in the UK. Our motto is, what benefits you benefits me. We work together to a stronger social support network here in Doncaster.

We were amazed that we got this funding. We were able to introduce new asylum seekers to the Trail and some locals that didn't even know it was right on their doorstep!

We held four walks altogether as part of the funding.

It was great to see that our community has grown as a result of the events but they have also helped us connect with other members who live outside of South Yorkshire not only for walks but to give us an opportunity to socialise in person, rather than virtually.

The age range of our participants was from 14 to 75, with some having group discussions but also taking the time to allow those who just wanted a one-to-one conversation with another person to do so in a safe space within the group. It was so wonderful to see this while being on the Trail, getting outside in fresh air and beautiful surroundings. Nature is a good mental stabiliser.

There were some great quotes that I heard during our walks:

"I've lived in Doncaster all my life and I'm discovering it all over again."

"I never knew South Yorkshire had places like this to visit!"

"I can't believe I am learning about this Trail walk in my home town"

These events gave us the chance to take people from their own small local community group to get out and enjoy nature. We've made some great connections with other social groups too as a result. It's really bolstered our community inclusivity.

Thank you for the opportunity.

The People Focused Group

Spectrum Rainbow Community, Doncaster	
Aim of the Organisation:	The aim of Spectrum Rainbow Community aim is to stoke and consolidate social inclusiveness and awareness for LGBTQIA+ persons seeking asylum in the UK as well as gender justice on a global platform.
